HiPP Stage 2 No Starch Organic BIO Combiotik Follow-On Formula (600g) - German

Age: From 6-10 Months

Yield: Approximately 151oz of Formula

HiPP BIO Combiotik Stage 2 No Starch is the newly released version of the German version of HiPP 2 No Starch. This updated version of the product is recognizable by white droplet with the molecular honeycomb design. Besides minor changes to the packaging, this new formulation has Metafolin, which has far superior bioavailability than the standard synthetic folates used in other baby formula brands (read more here: <https://tinyurl.com/hippmetafolin>).

This formula is suitable for infants between 6 and 10 months of age and is intended as an alternative to the standard HiPP Combiotik Stage 2, which contains starch. HiPP 2 No Starch contains iron for cognitive development, vitamins A, C and D for the immune system, DHA and ALA for brain and nervous system development. Added probiotics support gut health, while added prebiotics help to soften baby's stool.

- ✓ Probiotics based on strains found in human breastmilk
- ✓ Vitamins A, C, D for baby's immune system
- ✓ Iron for cognitive development
- ✓ DHA & ALA for brain & eye development
- ✓ No starch
- ✓ No corn-based sweeteners
- ✓ No maltodextrin
- ✓ Certified organic by EU
- ✓ No gluten
- ✓ No GMOs
- ✓ Now with Metafolin

INSTRUCTIONS

1. Boil water freshly for each of baby's meals and allow to cool down to 120 degrees Fahrenheit (50 °C).
2. Pour boiled water into a clean and sterilized bottle.
3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
4. Close the bottle with the nipple and cap and vigorously shake.
5. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~ 37 °C) and ALWAYS test the temperature of the milk before feeding to avoid scalding or burning your little one.

There are many parents that regularly use distilled water without boiling it prior to mixing, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even the WHO recommends pre-boiling tap or distilled water. [Watch this video for more insight into this topic.](#)
