## HiPP Anti-Reflux Special Milk Multi-Stage Formula (600g)

**Age:** From Birth Onwards (Consult Pediatrician Before Using)

**Yield:** Approximately 157 fl oz of Formula

This is the NEW LARGER 600 GRAM version of HiPP Anti-Reflux, which now uses only lactose as the carbohydrate, replacing the maltodextrin found in the old version of this formula. This new version also contains more DHA per the new EU directive on infant formulas. HiPP Anti-Reflux Special Milk (Anti-Reflux or AR Spezialnahrung in German) is intended for babies that spit-up noticeably more than the typical infant. After feeding it is completely normal for babies to spit up. Some babies, however, spit up significantly more than what is to be expected. HiPP Anti-Reflux helps babies experiencing reflux and excessive spit-up through the addition of natural locust bean gum flour, which makes this formula especially creamy. This, in turns, helps to keep more of the formula in baby's stomach, reducing reflux and spit-up. HiPP Anti-Reflux should only be used after consulting your pediatrician.

- ✓ Formulated for reflux and excessive spitting up
- ✓ Probiotics based on strains found in human breast milk
- ✓ Prebiotics for gut health and softer stool

- ✓ No corn-based sweeteners
- ✓ No soy
- ✓ No gluten

- ✓ No GMOs
- ✓ Added DHA

# bottles & burps

## INSTRUCTIONS

1. Boil water freshly for each of baby's meals and allow to cool down to 122 degrees Fahrenheit (50°C).
2. Pour in the amount of this previously boiled water (but now cooled to around 122 degrees Fahrenheit) into a clean and sterilized bottle.
3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
4. Close the bottle with the nipple and cap and vigorously shake.
5. Now (only for HiPP AR) let the bottle sit for 7 minutes (in order to thicken). Shake after this thickening period again.
6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~ 37 °C) and **ALWAYS** test the temperature of the milk before feeding to avoid scalding or burning your little one.

There are many mothers that regularly use distilled water without boiling it, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even global health organizations pre-boiling tap or distilled water instead. [Watch this video for more insight into this topic.](#)

### MIXING AND FEEDING INSTRUCTIONS (HiPP ANTI-REFLUX AR)

AGE	BOTTLES PER DAY	WATER (OZ)	# OF SCOOPS
0 to 2 Weeks	7-8	2	2
3 to 4 Weeks	5-7	3	3
5 to 8 Weeks	5-6	4	4
3 to 4 Months	5	5	5
5 <sup>th</sup> Month	4-5	6	6
After 6 Months	4	7	7

### DON'T FORGET

- ONCE YOU HAVE OPENED THE INNER FOIL BAG CONTAINING YOUR FORMULA, YOU SHOULD USE WITHIN 2 WEEKS. AVOID STORING IN AREAS OF HIGH HEAT OR HUMIDITY.
- IF MIXED FORMULA IS NOT CONSUMED WITHIN AN HOUR, YOU SHOULD DISCARD IT.
- DO NOT MICROWAVE BOTTLES OR FORMULA.

## INGREDIENTS

Skimmed milk, whey product, vegetable oils (sustainably farmed palm oil, rapeseed oil, sunflower oil), lactose, locust bean gum (as a natural thickening agent), fish oil as DHA source, potassium chloride, calcium carbonate, M. alpina oil (DHA source), sodium citrate, calcium orthophosphate, choline, calcium chloride, L-phenylalanine, L-tyrosine, L-Leucine, magnesium carbonate, L-tryptophan, L-Histidine, iron sulfate, lactic acid stabilizer, vitamin C, zinc sulfate, natural lactic acid culture (lactobacillus fermentum CECT5716), niacin, pantothenic acid, inositol, vitamin E, copper sulfate, vitamin A, vitamin B1, vitamin B6, potassium iodate, folic acid, sodium selenate, vitamin K, vitamin D, biotin, vitamin B12.
