HIPP2123

HiPP Hypoallergenic (HA) Stage PRE Combiotic Formula (600g) - Germany

Age: From Birth Until 6 Months

Yield: Approximately 156oz of Formula

HiPP Hypoallergenic (HA) PRE Combiotic is suitable from birth onwards. The HiPP Hypoallergenic product line is formulated to meet the needs of children who are at risk of allergies. The milk protein can be a decisive factor in triggering allergies in humans. The HiPP Hypoallergenic product line is based on extensively hydrolyzing the (cow) milk protein, which makes the protein molecules smaller, simpler and easier for baby to process. Stated differently, the hydrolyzed milk protein is less "foreign" to the human body than the intact cow milk protein.

HiPP has a strong foundation built on scientific research and provides everything necessary for a baby's development, such as Vitamins A, C, and D. Vitamin D is essential for calcium absorption and bone growth and Omegas 3 & 6, naturally found in breast milk, are long chains of polyunsaturated fatty acids (LCPs) that help with brain and eye development.

Crucial to the success of prevention of allergy is that the HA formula should stay consistent in the first 4 to 6 months of your baby's life. Even a small amount of infant formula with non-hydrolyzed protein can lead to sensitization and so jeopardize the benefits of a low-allergen diet.

- ✓ Hypoallergenic; only extensively hydrolyzed cow milk protein
- ✓ Probiotics based on strains found in human breast milk
- ✓ Only Lactose is used as a carbohydrate / sugar
- ✓ Vitamins A, C, D for baby's immune system
- ✓ Omegas 3 & 6 for brain and central nervous system development
- ✓ Prebiotics (GOS) for gut health and softer stool
- ✓ No corn-based sweeteners
- ✓ No maltodextrin
- ✓ No starch
- ✓ No soy
- ✓ No gluten
- ✓ No GMOs
- ✓ Now with Metafolin

INSTRUCTIONS

Preparation for all powdered formulas (also consistent with US FDA guidelines):

1. Boil water freshly for each of baby's meals and allow to cool down to 120 degrees Fahrenheit (50 °C) before mixing with formula powder.
2. Pour in ½ of the necessary amount of boiled water into a clean and sterilized bottle.
3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
4. Close the bottle with the nipple and cap and vigorously shake.
5. Add the remaining half of the water to the bottle and shake again.
6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~ 37 °C) and **ALWAYS** test the temperature of the milk before feeding to avoid scalding or burning your little one.

There are many mothers that regularly use distilled water without boiling it, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even the US FDA recommends pre-boiling tap or distilled water instead.

MIXING AND FEEDING INSTRUCTIONS (HiPP HA STAGE PRE)

AGE	BOTTLES PER DAY	WATER (OZ)	# OF SCOOPS
0 to 2 Weeks*	7-8	2	2
3 to 4 Weeks	5-7	3	3
5 to 6 Weeks	5-6	4	4
3 to 4 Months	5	5	5
5 th Month	4-5	6	6
After 6 Months	4	7	7

* Insofar as not otherwise indicated by your pediatrician.

DON'T FORGET

- ONCE YOU HAVE OPENED THE INNER FOIL BAG CONTAINING YOUR FORMULA, YOU SHOULD USE WITHIN 2 WEEKS. AVOID STORING IN AREAS OF HIGH HEAT OR HUMIDITY.
- WE HIGHLY RECOMMEND USING AN AIRTIGHT FORMULA STORAGE CONTAINER.
- IF MIXED FORMULA IS NOT CONSUMED WITHIN AN HOUR, YOU SHOULD DISCARD IT.
- DO NOT MICROWAVE BOTTLES OR FORMULA.

INGREDIENTS

Lactose, vegetable oils (sustainably sourced palm oil, rapeseed oil, sunflower oil), whey protein hydrolysate, galacto-oligosaccharides (GOS) from lactose, calcium orthophosphate, potassium chloride, emulsifier: citric acid esters of mono- and diglycerides of fatty acids, potassium hydroxide, fish oil as Omega 3 and 6 source, M. alpina oil (as
